

NEWS RELEASE

20th April 2009

New RIBA approved and CIBSE recognised Radiant Heating

CPD

SAS International has developed a new RIBA approved and CIBSE recognised CPD presentation on the theme of Radiant Heating.

Ceiling mounted Radiant Heating Panels (RHPs) are produced by HCP, the specialist heating division of SAS International.

Designed to inform both architects and engineers, the presentation provides an introduction and overview of energy efficient Radiant Heating Panels (RHPs). It includes how RHPs work, performance and applications, technical specifications, and design considerations when specifying.

Radiant Heating solutions are increasingly specified in the healthcare and educational sectors, where the benefits of freeing up floor and wall space, and integration with natural ventilation strategies are well recognised. Additionally RHPs can contribute towards reduced cleaning regimes and help meet infection control targets by reducing the cross infection risks associated with other systems.

You can book a radiant heating CPD by emailing cpd@sasint.co.uk or calling 0118 929 0900.

For further information on radiant heating panels visit:

www.hcp-sasint.co.uk/radiant-heating.htm

Background information on SAS International

With over 40 years of experience, SAS International is a leading designer and manufacturer of suspended Metal Ceilings, Room Comfort systems and bespoke Architectural Metalwork products.

The versatile range of suspended Metal Ceilings includes both standard and bespoke systems, which can incorporate acoustic absorption material and apertures for building services such as luminaires and fire/smoke detectors.

SAS international Room Comfort products include energy efficient radiant chilled ceilings, passive and active chilled beam ceiling systems and Integrated Service Modules (ISMs). Additionally SAS Room Comfort products help to reduce energy bills and reduce carbon emissions.

Bespoke Architectural Metalwork solutions such as acoustic baffles, acoustic attenuators, acoustic wall panelling, service bulkheads, column casings, etc. are designed and manufactured to meet specific architectural and project requirements.

Metal Ceilings • Room Comfort • Doors • Architectural Metalwork
