

PRESS RELEASE: HCP LAUNCH NEW WEBSITE

FOR IMMEDIATE RELEASE

Hastings, November 22nd 2006: HCP, division of SAS International, has updated its website: www.hcp-sasint.co.uk. Designed to offer visitors more comprehensive product information, the easy to use site also incorporates a new search function, a news section and an area for case studies.

HCP's range of heating products offer an efficient and low maintenance solution to space heating and compliment the SAS International product range of chilled ceilings, suspended metal ceiling systems, Integrated Service Modules, partitioning and architectural metalwork. In light of the recent EU Energy Performance of Buildings directive and changes to Part L of the Building Regulations, many people are turning to HCP for a more energy efficient and low maintenance solution.

Products available from HCP include:

- Trench heating
- Perimeter heating
- Radiant heating

HCP strives to offer customers the highest quality product and service. Working in partnership with clients, consultants, contractors and other manufacturers, HCP provides solutions to meet specific aesthetic, performance and budget criteria. HCP also has the capability to undertake projects through concept, design, manufacture and installation.

As a division of SAS International, HCP products are manufactured in facilities located in the UK. Employing the most advanced computer controlled machinery; HCP can efficiently manufacture both high volume off-the-shelf and bespoke products to the highest quality standards.
